PROFILE

IT student specializing in Software Development with a strong focus on Frontend Development. Hands-on experience building responsive web applications using React.js, TypeScript, Next.js, JavaScript, HTML, and CSS. Familiar with REST APIs, frontend testing, Git/GitHub, SQL, databases, and backend fundamentals. Interested in building clean, responsive, and user-focused web applications, and seeking an international Frontend Development internship or junior opportunity.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3
Testing: Vitest, React Testing Library, Playwright
APIs & Development: REST APIs, API Integration, Responsive Web Design, Component-Based Development
Backend Fundamentals: Backend Concepts, Server-Side Fundamentals, API Communication
Database: SQL, Database Fundamentals
Tools: Git, GitHub, Vite, Figma, README & Documentation

PROJECTS

Roro TV — *HTML, CSS, JavaScript*

- Built a responsive movie and TV web application using vanilla JavaScript.
- Implemented interactive UI functionality and responsive layouts.
- Structured the application using reusable HTML, CSS, and JavaScript components.

Roro TV 2 — *React.js, TypeScript, CSS*

- Developed a modern movie and TV application using React.js and TypeScript.
- Implemented reusable components, routing, navigation, search functionality, and multiple user-focused pages.
- Integrated frontend functionality with APIs and structured the application for maintainability.
- Deployed the application using GitHub Pages.

Luffy Donuts — *React.js, Next.js, TypeScript, CSS*

- Developed a responsive donut shop web application using React.js, Next.js, and TypeScript.
- Built reusable UI components and structured product-focused pages.
- Focused on responsive design, clean UI structure, and frontend development best practices.

Solar-Powered Robot — SERA — *Hardware / Energy Systems*

- Designed and developed a solar-powered robot with a focus on energy efficiency.

Competitive Programming — ICPC Preparation — *C++*

- Solved algorithmic and data structure problems using C++.
- Practiced problem-solving and fundamental programming concepts.

EXPERIENCE

Teleperformance — Customer Service Representative

- Developed communication, active listening, problem-solving, and customer-handling skills in a professional work environment.

EDUCATION

Delta Technological University — Information Technology

- Software Specialization | Expected Graduation: 2028

WE Applied Technology School — Communications Department

- Technical secondary education with practical communications training.

CERTIFICATIONS & TRAINING

- Pearson Level 3 Diploma — Communications
- Cisco CCNA
- ICDL Certificate
- 3-Year Communications Training / Internship — 256 Hours
